

# Comic Strip

liquids, or a gases

liquids, and/or gases

heat on volume in solids

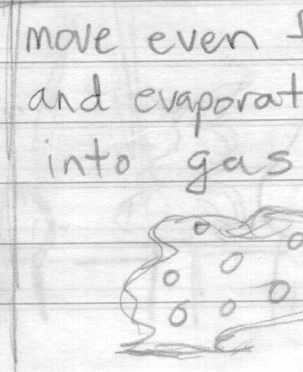

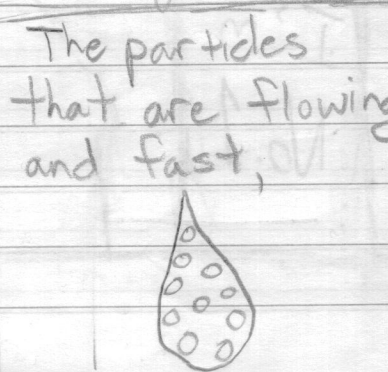

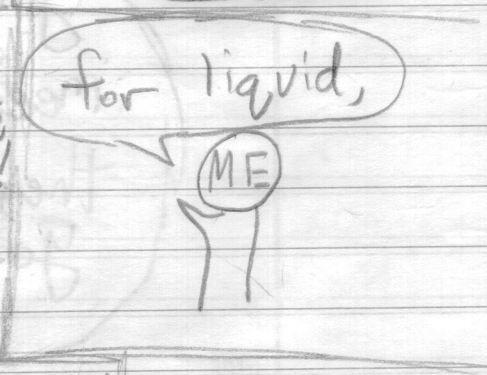

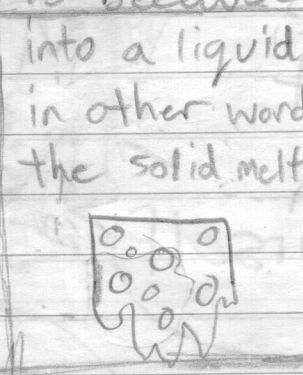

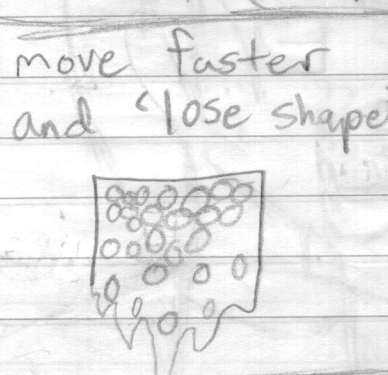

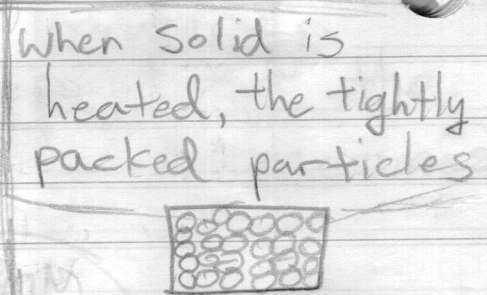

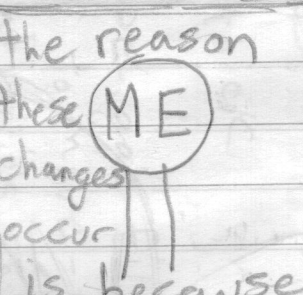

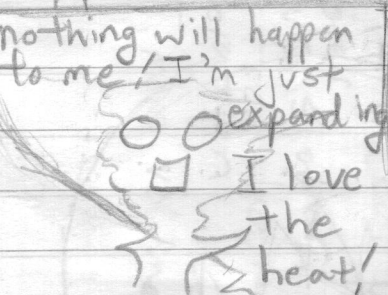

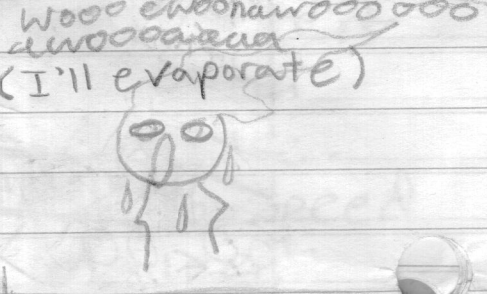

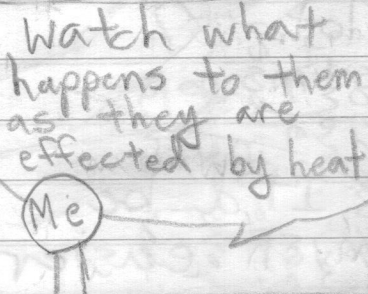

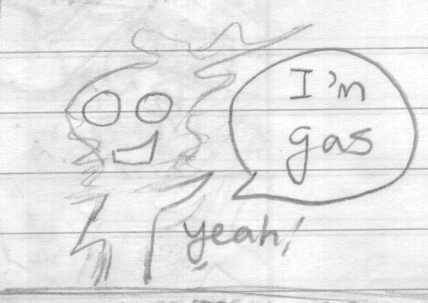

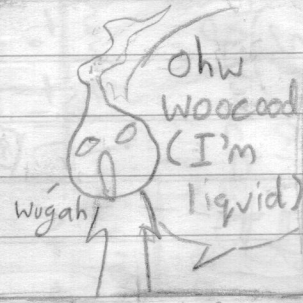

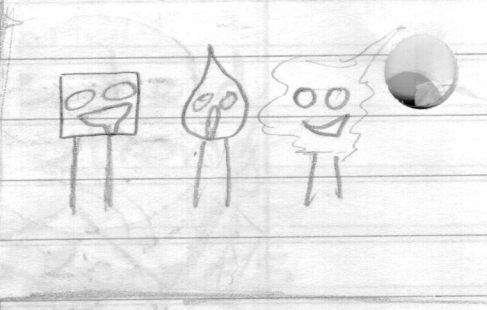

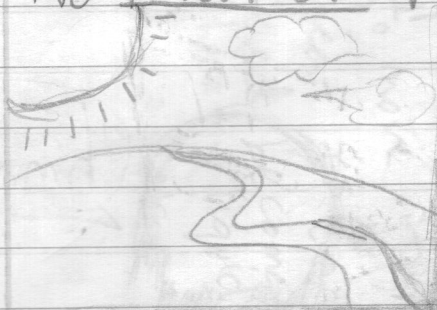

liquids, and gases

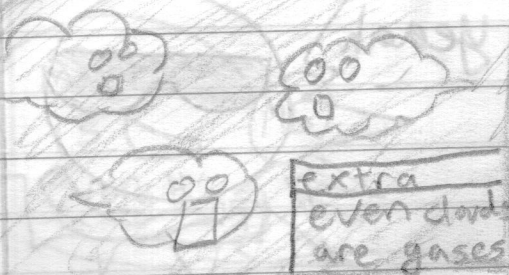

volume in solids,

liquids, & gases (7s73)

# No Matter What, Buddies / Part One

# No Matter What, Buddies! Part two

I'm feeling more like myself!

Yeah!

I..I.. I feel better... but... I feel like...

My particles are slowing down

agwa hlep nagashaba (Help! I'm transforming!)

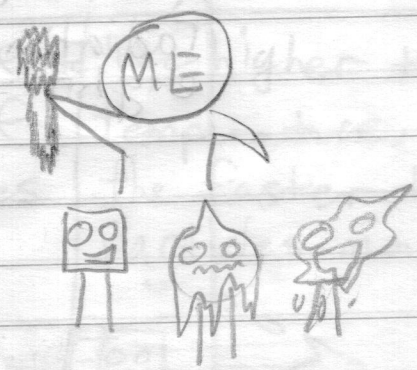

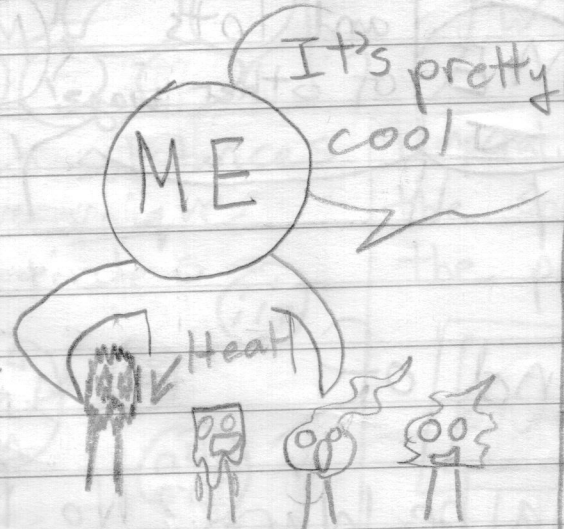

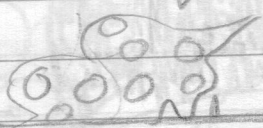

the reason these changes occur is because

When heat is taken away from gas, the wild particles

slowwwww down turning into a liquid!

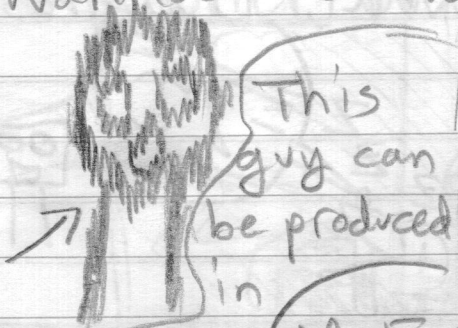

as for liquid,

The flowing particles become packed and slowww down

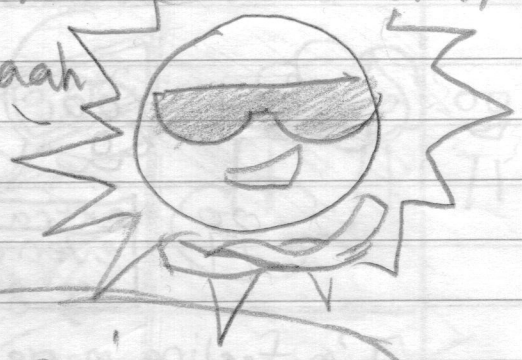

End of No matter what Buddies!

Wanna be Warm? No Problem!

This guy can be produced in many ways

yeah

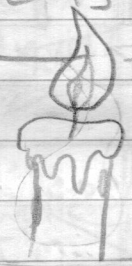

ME

Sun is one

Vibration is two

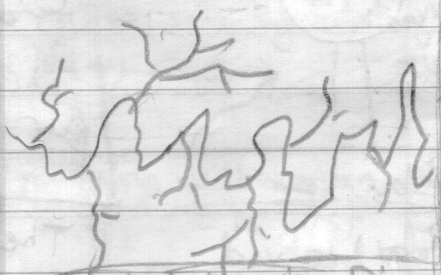

Fire is Three

Friction is Four

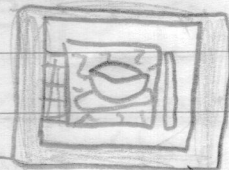

movement is six

electricity is five

Body heat is Seven

microwave Radiation is eight

ME

and lots of other ways!

ME

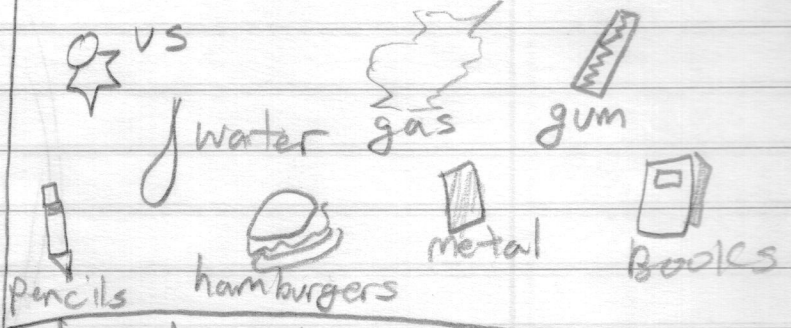

End of

Wanna be Warm? No Problem!

# Particle Theory of Matter

matter is everything

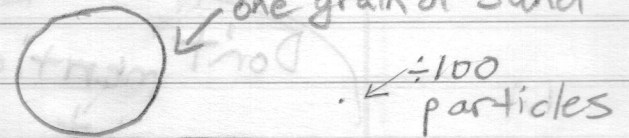

ME

They're all Matter!

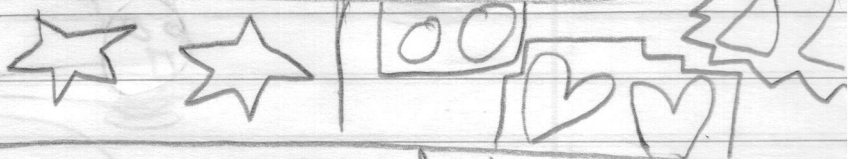

and all matter is made of tiny, tiny particles.

ME

Particles are always moving

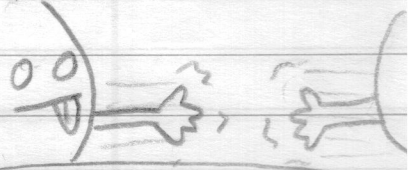

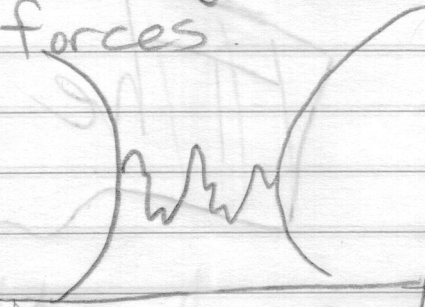

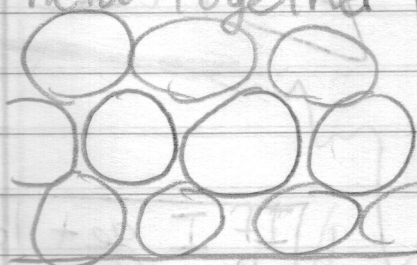

all particles of one substance are identical

Particles of matter are held together

by strong electric forces

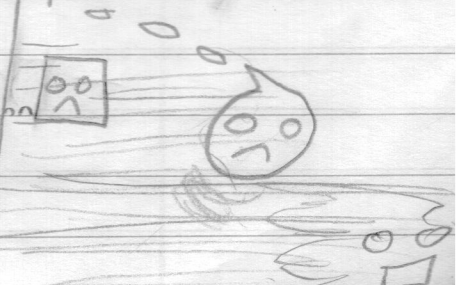

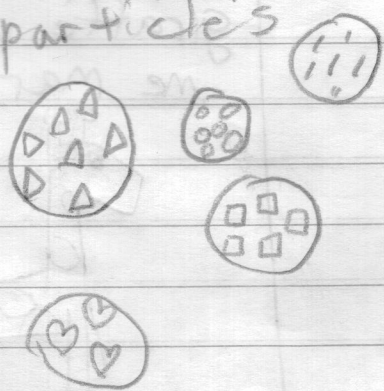

There are spaces between particles

Each substances have unique particles

Temperature affects the speed of the particles

The higher the temperature, the faster the particles move.

Thanks  
guys

Don't  
mention  
it

The End

IF I get lower  
than 100%, I'll  
hope this  
giraffe will get  
me marks

-Thank you-
